

2nd Brain

Aapka Personal Operating System — Notion Guide

Notion pehli baar use kar rahe ho? Koi baat nahi.

Yeh guide zero se shuru karti hai — Notion kya hai, aapka system kaise bana hai, aur roz kaise chalana hai.

Kiske liye	Alok Mittal
Workspace	 2nd Brain (Notion)
Version	v0.3.0 — 8 databases live
Roz lagega	7 minute · Hafte mein 20 minute
Padhne mein	~15 minute

Ek line mein poora system: **Capture bina soche** → **Route ek baar roz** → **Review hafte mein ek baar**.

Notion kya hai — 2 minute mein

Notion ek aisi jagah hai jahan **pages** aur **databases** hote hain. Bas do hi cheezein samajhni hain:

 **Page**

Ek khaali kaagaz. Isme likh sakte ho, dusre pages rakh sakte ho. Aapka 🧠 **2nd Brain** ek page hai.

 **Database**

Excel sheet jaisa — par har row khud ek page hai jise khol sakte ho. **Tasks, Goals** — sab databases hain.

Screen par kya kahan hai

Notion ka layout — sidebar, view tabs, aur database rows

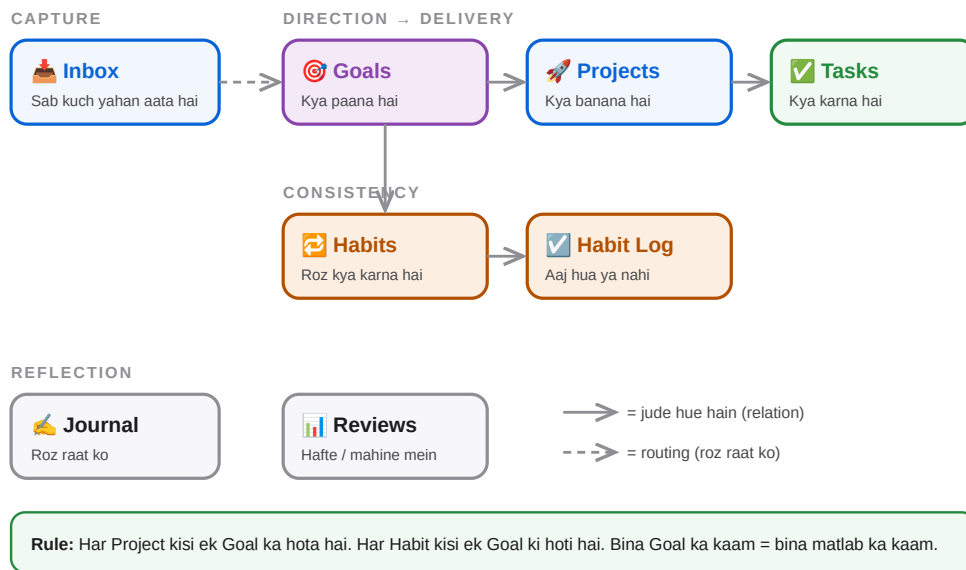

Sabse zaroori concept: VIEWS. Ek hi database ko alag-alag tareeke se dekh sakte ho. 🌞 Due today aur ⚠ Slipped — dono same Tasks database hain, bas filter alag hai. Kuch delete nahi hota, sirf chhupta hai.

Char cheezein jo roz kaam aayengi

KYA KARNA HAI	KAISE
Nayi row banana	Table ke neeche + New pe click
Row kholna	Row pe hover karo → OPEN button aayega
Field bharna	Cell pe click karo, type karo. Select fields mein list se chuno
View badalna	Upar tabs pe click — 🌞 Due today , ⚠ Slipped

Aapka system — 8 databases

Yeh koi random tables ka collection nahi hai. Har database ka ek kaam hai, aur woh aapas mein **jude hue** hain.

Aapka poora system — ek nazar mein

Relations ka matlab kya hai? Jab aap ek Task ko Project se jodte ho, toh Project ke andar apne aap woh Task dikhne lagta hai. Dono jagah likhna nahi padta — ek baar jodo, dono taraf dikh jaayega. **Yahi is system ki asli taakat hai.**

Pehla setup — 10 minute, ek baar

Test data mat daalo. **Ek asli cheez** daalo jo aapko sach mein karni hai. System tabhi samajh aayega.

1 🎯 Goals kholo → ek goal likho

Jo is quarter mein sach mein chahiye. Jaise: *"Half marathon complete karna"*

Success criteria field zaroor bharo — woh condition jisse pata chale ki goal pura ho gaya. Isko chhoda toh goal kabhi *khatam* hi nahi hoga.

Sahi: "21 km, 2:15 se kam" · Galat: "Fit ho jana"

2 🚀 Projects kholo → ek project banao

`Goal` field pe click karke upar wala goal chuno.

`Definition of done` — kaam *shuru karne se pehle* likho ki khatam kab maanenge. Ye na ho toh project kabhi khatam nahi hota, phailta rehta hai.

3 ✅ Tasks kholo → 3-5 tasks daalo

Har task ko `Project` se jodo. Har task **verb se shuru** karo — "Plan banana" nahi, "Running plan likhna".

`Energy` zaroor set karo: `deep` `shallow` `admin` `recovery`

4 🔄 Habits kholo → ek habit banao

Goal se jodo. `Cadence` chuno (daily/weekly).

Minimum version — sabse zaroori field. Woh chhoti si cheez jo *bure din mein bhi* ho jaaye aur count ho.

Habit: "5 km daudna" → Minimum version: "Joote pehen ke 5 minute chalna"

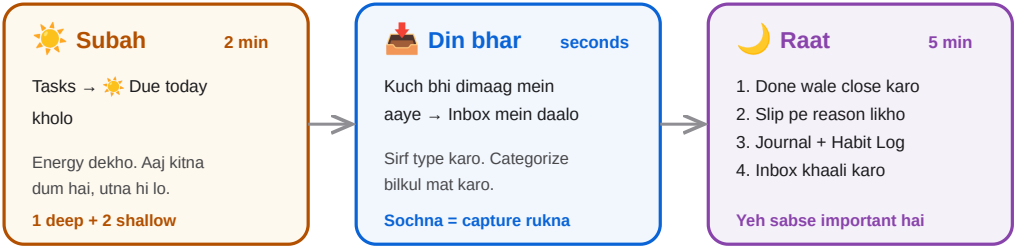

Yahi ek field aapki habit ko bure hafte mein bachati hai.

5 📝 Aaj raat 📝 Journal mein ek entry likho

Ek field bhi kaafi hai. Bas shuruaat kar do.

Shuruaat mein kitna? Ek goal. Ek project. Paanch tasks. Ek habit. Bas. Pehle din 20 goals daalne se system nahi chalta — woh sabse aam galti hai.

Roz ka routine — 7 minute

Agar sirf ek cheez kar sako:
Raat ko slip hue task pe "Why it slipped" likho. Yahi poore system ka sabse keemti data hai.

"Why it slipped" itna important kyun hai?

Kyunki hafte ke ant mein aap yeh column padhoge. Aur agar **ek hi wajah teen baar** dikhi — jaise "meeting mein time nikal gaya" — toh problem aapki discipline nahi hai. **Problem system mein hai.** Aur system theek kiya ja sakta hai; khud ko kosne se kuch nahi hota.

AISA LIKHO	AISA MAT LIKHO
"3 baje tak meetings thi, deep work ka time hi nahi bacha"	"Busy tha"
"Task bahut bada tha, shuru hi nahi kar paya"	"Aalas aa gaya"
"Sharma ji ka reply nahi aaya"	"Blocked"

Habit Log kaise bharein

☒ Habit Log → ☒ Today view → → Habit chuno, Date aaj ki, aur set karo:

OUTCOME	KAB LAGANA HAI
☒ met	Poora ho gaya
☐ partial	Sirf minimum version hua — ye bhi safalta hai , streak nahi tootegi
☐ missed	Nahi hua. Note mein wajah likho
☐ paused	Bimari, safar. Miss count nahi hoga

Hafta mein ek baar — 20 minute

Roz ka kaam cheezein *organise* karta hai. Sirf review hi **disha badalta hai**. Isliye yeh 20 minute sabse zyada value dete hain.

- 1 **Tasks** →  **Slipped** view kholo
"Why it slipped" column padho. Koi pattern dikh raha hai?
- 2 **Goals** →  **Active** view kholo
Har goal ke neeche kuch hila? Nahi hila toh honestly maano.
- 3 **Projects** →  **Board** kholo
14 din se koi task complete nahi hua? Woh project *stalled* hai. Uska matlab hai koi decision pending hai.
- 4  **Reviews** mein nayi entry banao
Type = **weekly**, period ki dates daalo.

Review mein kya likhna hai

FIELD	KYA LIKHNA HAI
What moved	Kya sach mein aage badha
What slipped	Slipped view se pattern uthao. Yeh ekmatra section hai jo yaadash pe nahi, sabooton pe bana hai.
Honest assessment	Kya main <i>sahi cheez</i> pe kaam kar raha tha? Isme koi data nahi hai — sirf sachai. Bina iske review sirf report hai.
Actions	Agle hafte kya badloge. 1-2 cheez, zyada nahi

Goal chhodna failure nahi hai. Agar koi goal 60 din se hila nahi, use **dormant** ya **abandoned** mark karo aur **Why abandoned** bharo.

Chhode hue goals ka record is system ka sabse keemti data ban jaayega — kyunki agle saal aap wahi goal dobara set karne se pehle padh sakoge ki pichhli baar kyun chhoda tha.

Mahine mein ek baar (60 min)

Wahi process, par **events nahi — trends** dekho. Char sawaal:

Kya goals abhi bhi sahi hain?

3 mahine pehle jo zaroori laga tha, kya ab bhi hai?

Kaunsa area chhoot raha hai?

Goals ko Area se group karo. Koi column khaali hai?

Energy ka pattern kya hai?

Kya cheez use hi nahi ho rahi?

Jo field ya database ek mahine se khaali hai — hata do.

Journal mein "depleted" kitni baar aaya? Load sustainable hai?

Zaroori fields — aur woh kyun hain

Har field ka ek karan hai. Notion mein kisi bhi field ke naam pe hover karoge toh uska explanation dikh jayega. Yeh sabse important hain:

FIELD	KAHAN	KYUN
Success criteria	Goals	Bina iske goal kabhi "poora" nahi hota — kyunki poora hone ki definition hi nahi hai
Definition of done	Projects	Kaam shuru karne se pehle likho, warna project phailta rahega
Energy	Tasks	Calendar khaali ghante dikhata hai, par nahi batata ki un ghanon mein deep work ho paayega ya nahi
Why it slipped	Tasks	Weekly review ka poora kachcha maal. System ki galtiyan yahin dikhti hain
Minimum version	Habits	Bure din mein habit bachane wali ek cheez
Why abandoned	Goals	Kya cheez maayne rakhna band kar gayi, aur kyun
Tomorrow's focus	Journal	Aaj raat aaj ke context se likho — kal subah dimaag saaf nahi hota

Khud ki view kaise banayein

Views pehle se 6 bane hue hain. Nayi banani ho toh 20 second ka kaam hai:

Naam ka niyam: "This week ka deep work" — accha. "Tasks filter 3" — bekaar.

Mobile pe capture

- 1 Notion app install karo — usi Google account se login (mittalok@gmail.com)
- 2  Inbox kholo → ... → Add to home screen
- 3 Ab ek tap mein capture. Yahi sabse zyada use hoga.

Mobile pe sirf **capture** karo. Organise laptop pe raat ko. Chhoti screen pe fields bharne ki koshish mat karo — wahin se system chhootna shuru hota hai.

Cheat sheet

 **Subah — 2 min**

Tasks →  Due today

Energy dekho

1 deep + 2 shallow chuno

 **Raat — 5 min**

Done close karo

Slip pe reason likho

Journal + Habit Log

Inbox khaali karo

 **Hafta — 20 min**

 Slipped padho

 Active check karo

 Reviews entry banao

 **Mahina — 60 min**

Trends dekho

Goals kaato ya rakho

Unused cheezein hatao

Paanch niyam

- 1 **Ek hi Inbox.** Sab kuch wahin se aata hai.
- 2 **Capture ke waqt sochna nahi.** Routing raat ko hoti hai.
- 3 **Har Project ka ek Goal.** Bina Goal ka project — ya toh Goal missing hai, ya project bekaar.
- 4 **Progress khud mat likho.** Woh neech ke kaam se apne aap banta hai.
- 5 **Chhodna bhi ek jawab hai.** Abandoned goal ka record rakhna faayde ka hai.

Jab system chhootne lage

3 din miss ho gaye? Backlog clear karne ki koshish *mat* karo. Aaj se shuru karo. Yeh system aise hi bana hai — pichhla hafta pura kiye bina bhi weekly review ho sakta hai.

Inbox mein 40 items? Sab delete kar do. 14 din se pada item ek backlog nahi hai — woh saboot hai ki woh cheez maayne nahi rakhti thi.

Abhi kya nahi hai — sach sach

NAHI HAI	ISKA MATLAB
15 aur databases (Finance, Health, Knowledge, People, Reading...)	Abhi sirf daily loop chal raha hai. Baaki maang pe ban jaayenge
AI agents	Koi plan draft nahi karega. Sab manual

Automations	Habit log roz khud bharna hoga
-------------	--------------------------------

Dashboards	Har database alag se kholna padega
------------	------------------------------------

Yeh sab aage aane wale phases mein hai. Par pehle 2 hafte **isi ko chalao** — jo kami khud mehsoos hogi, woh guess se hamesha behtar hoti hai.

Workspace: Notion → 🧠 2nd Brain
